

PSI Mapper Protocol and Procedure

Revised 10/19/20

1. Mappers are only present on walkthroughs.
2. It is the Mapper's responsibility to keep track of all of the following during an investigation/walkthrough:
 - a. Drawing out the general layout of a residence or facility
 - b. Using the "post-it" note protocol when it comes to labeling room names. The "post-it" note protocol is when the Mapper designates a room name, writes it on a "post-it" note with a marker, and places it in clear view for all other team members and the client to view. This name that the room is assigned should be posted on the map and be used in everyone's documentation.
 - c. Documenting base EMF readings on all walls, ceiling, floor in a room.
 - d. Documenting areas where drafts can occur (e.g. windows, vents, etc).
 - e. Documenting areas where the client has experienced paranormal phenomena.
 - f. Recording EMF readings from wall sockets, switches, and fuseboxes; then including these on the map.
3. Mappers can also be assigned to other tasks by the team leader.
4. Mappers must work closely with technicians during walkthroughs and must map any abnormal equipment readings noted by the Tech.
5. Mappers (and everyone else) need to comply with the "post-it" note

protocol when designating room names.

6. Mappers must turn in their report to the Lead, with copies of all pertinent data gathered, including any video, photo and audio evidence from their own equipment within 2 weeks of a walkthrough.
7. Mappers may not discuss or reveal any information to other PSI members (with exception of other teammates on the assigned walkthrough) regarding the walkthrough prior to the investigation.
8. Immediately report any hazardous situations noted on the premises to the team lead.
9. Mappers should document any personal psychic phenomena by writing their experience down, including the time, immediately after the event (e.g. 7/28/10 @ 2:00 PM: I experienced a vision related to a man dying.) This information needs to be included in the mapper's log and report.
10. Every 5 minutes write down where you are located and what you are doing. **You can also do this via audio recorder**, however during EVP sessions these experiences should be written down. These notes should be turned into the lead. If in a recording, send the file to the lead at the end of the walkthrough before you go home.
11. Background chatter and other non-investigation related discussions should be kept to a minimum during the walkthrough, but especially during EVP sessions.
